**REQUEST FOR BID
CL24-014
Mowing & Litter Control**

The City of Lawton is hereby amending the above-mentioned Request for Bid (CL) to include the **Addition of Drainage Areas** to the solicitation. The original bid documentation can be found on at the [City of Lawton website](#), the City Clerk's office at 212 SW 9th Street, Lawton, OK 73501 and on the [Bidnet Direct](#) website.

The following attachments are being revised in the Mowing & Litter Control bid documents to include the addition of Drainage Areas:

1. Area 6: Drainage
 - a. An additional five (5) pages of Drainage Area Descriptions.
2. Drainage Vegetation Management Document
 - a. An additional two (2) pages of Specifications to Explain the scope of work within Drainage Areas.
3. Price Sheet
 - a. This will replace the Original Price Sheet on page 25 in the Original Bid Documents
 - i. The only change between the two is the addition of **Area 6: Drainage Areas** under Area Description

In the event that it is necessary to further amend, revise or supplement any part of this RFB (CL), additional addenda will be posted to the City's website as well as Bidnet Direct. The City will make a reasonable effort to provide the addenda to all bidders to whom the City provided the initial Invitation to Bid. The City is not responsible for any explanation, clarification, interpretation, or approval made or given in any manner except by written addenda issued by the City.

ALL BIDDERS SHALL ACKNOWLEDGE AND INCLUDE THIS ADDENDA #1 AS PART OF THEIR SUBMITTAL PACKAGE.

Drainage Vegetation Management

Drainage Maintenance (580) 581-3424

Description:

The City of Lawton is requesting proposals for the vegetation management within the drainage conveyance areas of the City of Lawton. The City of Lawton has approximately 453 acres of vegetative drainage area that must be maintained while still preserving the water quality aspects. Drainage maintenance is divided into 3 areas of operation: vegetation removal, herbicide application, and selective clearing. Maintenance is to be performed from April 1st through September 30th. Occasional the mowing season will need to be extended into March and October. The maintenance map is located at <https://colgis.maps.arcgis.com/apps/webappviewer/index.html?id=796de040dad41c7a4b860b3942771f7> and a narrative of mowing area is attached. If a discrepancy is found between the description and map, reference the map for location needs.

Scope of Work:

Review and analyze the existing Drainage Maintenance operations. This will include interview staff to determine existing issues, activities and service levels.

1. Vegetation management is to be performed at all locations identified on the Drainage Maintenance Location List. The digital mowing map may be referenced for additional location information.
2. Perform vegetation removal through mowing, edging, and trimming. Frequency of activities is dependent upon vegetation height but must be cut at least 3 times during the growing season, March through October. Vegetation removal must be performed once it reaches a maximum height of 6 inches on overbanks and 24 inches within the buffer area. No mowing, edging or trimming is to be performed within the channel unless identified in the Drainage Maintenance Location List or is conducted as selective clearing. See selective clearing section for additional channel maintenance requirements.
 - a. Litter control must be performed prior to vegetation removal. Litter is defined as wood, paper products, glass, plastics and metal containers. These items must be picked up and removed from the area. Objects too large to be picked up by hand should be reported to the City staff for removal.
 - b. Maintain 5-foot riparian buffer of natural drainage channels. The riparian buffer is the band of vegetation bordering a body of water. Riparian buffers prevent erosion and improve water quality by trapping and removing of sediment and other contaminants in stormwater. This protected area does not apply to shallow vegetated swales or channels identified on the Drainage Maintenance Location List. Any questions regarding riparian areas should be directed to the Drainage Superintendent.

- c. Mowing is the cutting of grass, weeds and vegetation. Grass will be mowed no lower than one (1) inch on overbanks and 4 inches within the buffer area. Objects and structures that are easily moved shall be moved, not cut around.
 - d. Edging is the removal of grass from top of curbs and sidewalks. Edging is to be done by motorized edger or tractor operated curb dresser that gives a straight lined, sharp cut.
 - e. Trimming is the removal of vegetation from around stationary objects such as signposts, bridges, guardrails, gas meters, concrete walls, fireplugs, and along fences. Trimming may be accomplished by chemical application and or machinery. All chemicals must be safe for aquatic use. Notice must be given regarding the type of chemical, application rate and distribution method. No chemicals will be used at any time on City property without prior written approval from the Drainage Superintendent.
 - f. Remove debris from impervious surfaces. All grass will be removed from street, top of curb, sidewalks and other impervious surfaces following mowing and trimming. This may be accomplished through the use of blower or bagging resulting in a clean, broom-swept appearance after completion.
 - g. Additional debris removal as necessary. Any debris build-up or blockages on private property created by vegetation management within drainage areas must be remediated within 24-hours of notification.
3. Perform herbicide application. Herbicide application is the targeted application to supplement the overall vegetation management program. Application increases stormwater conveyance, decreases maintenance costs and increases plant diversity. This is used to pinpoint undesirable and harmful plant species so that beneficial vegetation can thrive. All chemicals must be safe for aquatic use. Notice must be given regarding the type of chemical, application rate and distribution method. No chemicals will be used at any time on City property without prior written approval from the Drainage Superintendent.
 - a. Maintain required herbicide applicator certifications and state pesticide/herbicide licenses.
 - b. Herbicide application should be used to target growth of cattails, Johnson grass and tree saplings.
 - c. Herbicide application should be used sparingly and not cause bank instability.
4. Perform selective clearing. Selective clearing is activities performed within the channel to increase conveyance capacities while maintaining streambed and environmental integrity. Activities are targeted to reducing undesirable species growth.
 - a. Selective clearing should be used to target growth of cattails, Johnson grass and tree saplings.
 - b. Selective clearing can be performed through the use of mulching or hand clearing.
 - c. Selective clearing must be performed when vegetative height exceeds 4 feet. Growth must be reduced to a minimum height of 1 foot within the channel.
 - d. Debris removal from selective clearing must be removed from the area. Debris must be properly disposed of and can not remain in the channel, buffer area or overbank. Any debris build-up or blockages created by selective clearing must be remediated within 24-hours of notification.
5. Communicate potential hazards to Drainage Maintenance Division. Hazards could include but are not limited to illegal dumping, potential pollutants, excessive erosion, channel blockages, vagrant activity, and illegal activities.

Bid Number: CL24-014

Bid Title: Mowing & Litter Contract

Vendor Name: _____
(please completed above information)

Price Sheet

(must be completed and returned with the bid)

Bid Option 1

Bid Option 2

**Monthly Cost to Provide
ONLY Mowing, Trimming
and Litter Control Services
for all twelve (12) Months**

**Monthly Cost to Provide
ALL Requested Services
Listed Under
"Specifications" for all
twelve (12) months**

Area Descriptions

Area Descriptions	<u>Bid Option 1</u>	<u>Bid Option 2</u>
Area 1: Major E-W Street Medians and Rights-of-Way		
Area 2: Major N-S Street Medians and Rights-of-Way		
Area 3: Neighborhood Medians		
Area 4: City Owned Vacant Lots		
Area 5: City Owned Facilities		
Area 6: Drainage Areas		

Any questions pertaining to the attached specifications, please contact Larry Parks at 580-581-3400 or larry.parks@lawtonok.gov

Notes:

1. This is a requirements contract.
2. There are insurance requirements for this contract.
3. Please submit two copies of any additional documents such as descriptive literature.

DISCLAIMER: The City of Lawton reserves the right to accept or reject any or all bids.
